◆ NOTES

- Only research papers concerning CST will be considered in this conference. After receiving and classifying the main part of the papers, the Programme Committee will specify and distribute the papers into sections and subsections and elaborate the programme of the conference.
- Full **ACM** keywords taxonomy is used for the manuscripts classification and papers reviewing.

### ◆ SUBMISSION REQUIREMENTS

Please be aware that ACM has introduced a new ACM Master Article Templates and Publication Workflow. Starting March 1, 2020, all ICPS events are required to use the new workflow: <https://www.acm.org/publications/taps/word-template-workflow>. Please, read it carefully! The Master article templates and workflow are to be used in conjunction with the ACM e-Rights System and the ACM CCS 2012 Author Support Tool found in the ACM Digital Library.

**Microsoft Word:** Write your paper using the [Submission Template](#) (Review Submission Format). Follow the embedded instructions to apply the paragraph styles to your various text elements. The text is in single-column format at this stage and no additional formatting is required at this point.

Upon acceptance, you will receive an email notification to download the **ACM Master Article Template - Microsoft Word**. Please choose the correct template version based on your platform: [[MAC 2011](#), [MAC 2016](#), or [Windows](#)]. Follow [these instructions](#) to attach the ACM ArticleTemplate to your accepted submission version and prepare your paper for validation.

**LaTeX:** Please use the latest version of the [Master Article Template - LaTeX](#) (1.75; published November 16, 2020) to create your article submission. Use the “manuscript” call to create a single column format. Please review the [LaTeX documentation](#) and [ACM's LaTeX best practices guide](#) should you have any questions.

As in the previous years please keep in mind that:

1. Do not change the title and the list of authors after announcing the results.
2. Papers should be up to 8 pages long (12 pages for keynote speakers).

To increase your paper's chance to be accepted for publication in the proceedings, it should:

3. Be at least 4 pages long
4. Have at least 8-10 references
5. Follow the following structure: Introduction, Review of previous work in the field and why a new solution is needed, Detailed description of proposed method/approach/solution, Testing and results, Conclusion

**A person could be a co-author of maximum of 3 papers. Please do not include authors' names in your initial file submission so we can implement a blind review process.**

◆ **CONFERENCE PROCEEDINGS** will include only papers which meet all formatting requirements and are accepted by the *CompSysTech'22* Programme Committee.

**Since 2007 the proceedings of CompSysTech have also been published in the ACM Digital Library, registered in the US Congress Library and indexed in SCOPUS, dblp, etc.**
